

TECHSTER

Tech students, entrepreneurial routes

Project number: 2020-1-PL01-KA203-082297

An Erasmus+ KA203 project that wants to tackle the limited competences on entrepreneurial behaviour and soft skills of technical students

01.10.2020 - 30.09.2022

The project is for:

- Higher Education teachers, managers and coordinators
- Higher Education students in technical education
- Stakeholders

The consortium

Coordinator

Aims

The **TECHSTER** project aims to enhance the entrepreneurial and soft skills of Higher Education teachers and students. A more entrepreneurial dimension to technical education will be developed and the local and European network of HE institutions will be strengthened. As a result, young people will become successful entrepreneurs not only at a national level, but also internationally.

ABOUT THE TECHSTER TEACHER TOOLBOX

The TECHSTER Teacher Toolbox contains 15 tools, ready to be implemented in the existing curricula by the HE professors in tech education in order to help them contribute to the development of their students' entrepreneurial and soft skills.

The TECHSTER Teacher Toolbox will include tools for:

- business modelling, for sustainability,
- pitching and digital storytelling
- creativity and problem solving
- cooperation and workflow organisation.

For each tool, a short summary is given in order to introduce them to the HE professors and to give them a brief preview of what comes next.

JUST A TASTE OF THE TECHSTER TEACHER TOOLBOX

Microsoft Sway

Microsoft Sway is the new app from Microsoft Office aiming to make easy the creation of interactive reports, stories, presentations, newsletters and many more. The perfect tool for developing creativity and designing skills.

Business Model Navigator

The Business Model Navigator aims to better understand the key drivers of business model success, as well as fostering business model innovation via a structured approach. It is one of the most adequate tools for developing entrepreneurial competences.

OUR PROGRESS AND NEXT STEPS

It has been a busy year since the TECHSTER project started in October 2020, but partners continue to work on the future materials with high motivation and ambition.

- On the 27 of May 2021, the second transnational project meeting was held online. During the meeting, the Partners discussed about the ongoing tasks and their promising plans for the future.
- Partners have finalized the TECHSTER Teacher Toolbox and it will be available online soon to anyone interested. The materials will be translated as soon as HE professors provide their feedback and recommendations.
- The TECHSTER Teacher Toolbox is also highly linked with the TECHSTER Teacher Guide, a guide that will facilitate the integration of the tools introduced in the Toolbox in the classroom. To do so, it will provide to HE professors in tech education guidelines, advice and, more specifically, a day by day plan for 15 days as well as suggestions for later on.
